---

Software Developer with a healthcare background and long-standing drive for learning and helping others. Earned a certificate in full stack development from the University of Pennsylvania. Passionate about creating fluid, captivating websites and web applications through accurate code, creative designs, and modern solutions. Proven proficiency in a variety of web based technologies, combined with a strong work ethic and detail oriented approach, make me a strong addition to any project or team.

## Technical Skills

Languages: Javascript ES6+, CSS3, HTML5

Technologies: React, NodeJS, ExpressJS, MySQL, Sequelize, MongoDB, Mongoose, IndexedDB, GraphQL, OOP, ORM, MVC, API, JQuery, PWA, Handlebars, Bootstrap, Heroku, GitHub

---

## Projects

### Brunch Bites

<https://github.com/PhalenH/brunch-bites> (github), <https://brunch-bites.herokuapp.com/> (deployed app)

- Find new brunch places via searching by city or town with the ability to save brunch locations to your personal watchlist on your profile page as well as save ones you've visited.
- React based application utilizing GraphQL to facilitate front-end/back-end interaction and functionality.
- Tools/Languages: JavaScript, CSS, HTML, Apollo GraphQL, React, Yelp API, MongoDB, Mongoose, Express, Bootstrap

### Wishlist: Secret Santa Manager

<https://github.com/PhalenH/gift-exchange-manager> (github), <https://wishlistmanager.herokuapp.com/> (deployed)

- Manage your work, family, or friend holiday gift exchanges all in one place.
- The website allows easy event detail customization, set reminders for events, and provides access to setting your personal wishlist. Contributed to front-end/back-end connection, server setup, handlebars, models, front-end javascript and helper functions, and helped with styling
- Tools/Languages: JavaScript, Handlebars, CSS, HTML, Bootstrap, Node-cron, MySQL, Sequelize, Express

### Tech Blog

<https://github.com/PhalenH/tech-blog> (github), <https://afternoon-everglades-02639.herokuapp.com/> (deployed)

- Community blog site where users can create and read tech related blog posts.
- Uses CRUD operations to allow users to create/delete/edit posts of their own as well as read and leave comments on other user's posts
- Tools/Languages: JavaScript, Handlebars, CSS, HTML, MySQL, Sequelize, Express

### Budget Tracker

<https://github.com/PhalenH/budget-tracker> (github), <https://budget-buddy-2022.herokuapp.com/> (deployed)

- Allows a user to add expenses and deposits to their budget as well as take out costs with or without a connection. When entering transactions offline, they will populate the total as a user enters them in and will still be present when brought back online.
  - Tools/Languages: Handlebars, JavaScript, MySQL, Sequelize, Express, CSS, HTML,
-
