Portfolio: <https://phalenh.github.io/phalen-portfolio/>

Physical Therapist Assistant pursuing a career change into the Information Technology (IT) field as a hard-working Full-Stack Web Developer. University of Pennsylvania LPS Coding bootcamp graduate involving 24 intensive weeks dedicated to designing and building full-stack web applications.

Developed a secret santa manager website, Brunch focused web app, and a tech related blog site among others. Passionate about turning ideas into results through accurate code, creative designs, and fluid user interactions and experiences. Proven proficiency in a variety of web based technologies, combined with my strong work ethic and detail oriented approach, make me a strong addition to any project.

Technical Skills

Frontend: HTML, CSS, JQuery, Javascript, Bootstrap, GraphQL, PWA, React

Backend: NodeJS, ExpressJS, MySQL, Sequelize, MongoDB, Mongoose, Handlebars, OOP, ORM, MVC, API

Projects

Brunch Bites

<https://github.com/PhalenH/brunch-bites> (github), <https://brunch-bites.herokuapp.com/> (deployed app)

- Primary contributor to application, fully responsible for graphql, styling of multiple components, and setup of server and database.
- Find new brunch places via searching by city or town with the ability to save brunch locations to your personal watchlist on your profile page as well as save ones you've visited.
- React based application utilizing graphql to facilitate front-end/back-end interaction and functionality.
- Tools/Languages: JavaScript, CSS, HTML, graphql, React, Yelp API, MongoDB, Mongoose, Express, Bootstrap

Wishlist: Secret Santa Manager

<https://github.com/PhalenH/gift-exchange-manager>(github), <https://wishlistmanager.herokuapp.com/> (deployed)

- All around contributor (front-end and back-end)
- Manage your work, family, or friend holiday gift exchanges all in one place.
- The website allows easy event detail customization, set reminders for events, and provides access to setting your personal wishlist. Contributed to front-end/back-end connection, server setup, handlebars, models, front-end javascript and helper functions, and helped with styling
- Tools/Languages: JavaScript, Handlebars, CSS, HTML, Bootstrap, Node-cron, MySQL, Sequelize, Express

Tech Blog

<https://github.com/PhalenH/tech-blog> (github), <https://afternoon-everglades-02639.herokuapp.com/> (deployed)

- Sole contributor to application
- Community blog site where users can create and read tech related blog posts.
- Uses CRUD operations to allow users to create/delete/edit posts of their own as well as read and leave comments on other user's posts
- Tools/Languages: JavaScript, Handlebars, CSS, HTML, MySQL, Sequelize, Express

Budget Track

<https://github.com/PhalenH/budget-tracker> (github), <https://budget-buddy-2022.herokuapp.com/> (deployed)

- Primary contributor (front and back end)
- Allows a user to add expenses and deposits to their budget as well as take out costs with or without a connection. When entering transactions offline, they will populate the total as a user enters them in and will still be present when brought back online.
- Tools/Languages: Handlebars, JavaScript, MySQL, Sequelize, Express, CSS, HTML,
